

Get a paper plate.

Fold it in half.

Draw a dragon body and wings on one side. You will cut both sides of the plate and leave the folded edge after all of the parts are drawn.

Notice the top of the line ends at the middle of the plate.

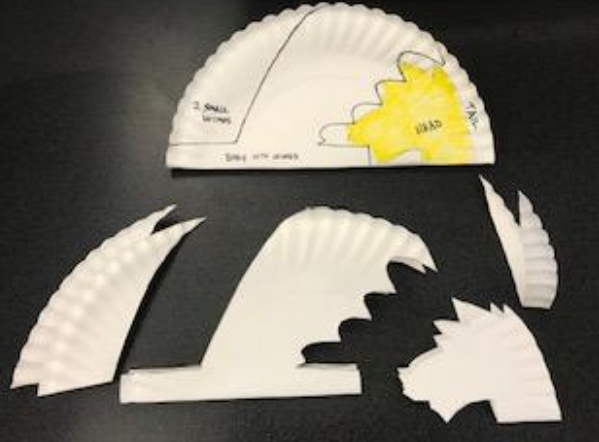

This edge is the tail.

Draw the head in the blank space but leave some room on the edge for the tail. See next picture.

This is all of the pieces drawn and cut out. You will have two heads cut but you only need one.

This is the time to color all of the pieces. (both sides)

Unfold the tail and staple to the body.

Staple head to the body.

Staple the small wings on either side of the body.

Voila! Your dragon!
