

Mouse Craft

Here are the supplies needed for the mouse craft: two different colored hearts out of paper, yarn for whiskers and tail, three tiny paper circles for eyes and nose, two paper half circles for inner ear. Tape is needed too. 😊

I start with the whiskers by wrapping the yarn twice around my three fingers.

I tie another piece of yarn around the middle of the looped yarn like this. I tie a knot so it won't slip out and then cut the looped ends. Even out the whiskers by trimming the ends.

Cut a longer piece of yarn for the tail. Now you have the whiskers and tail for your mouse.

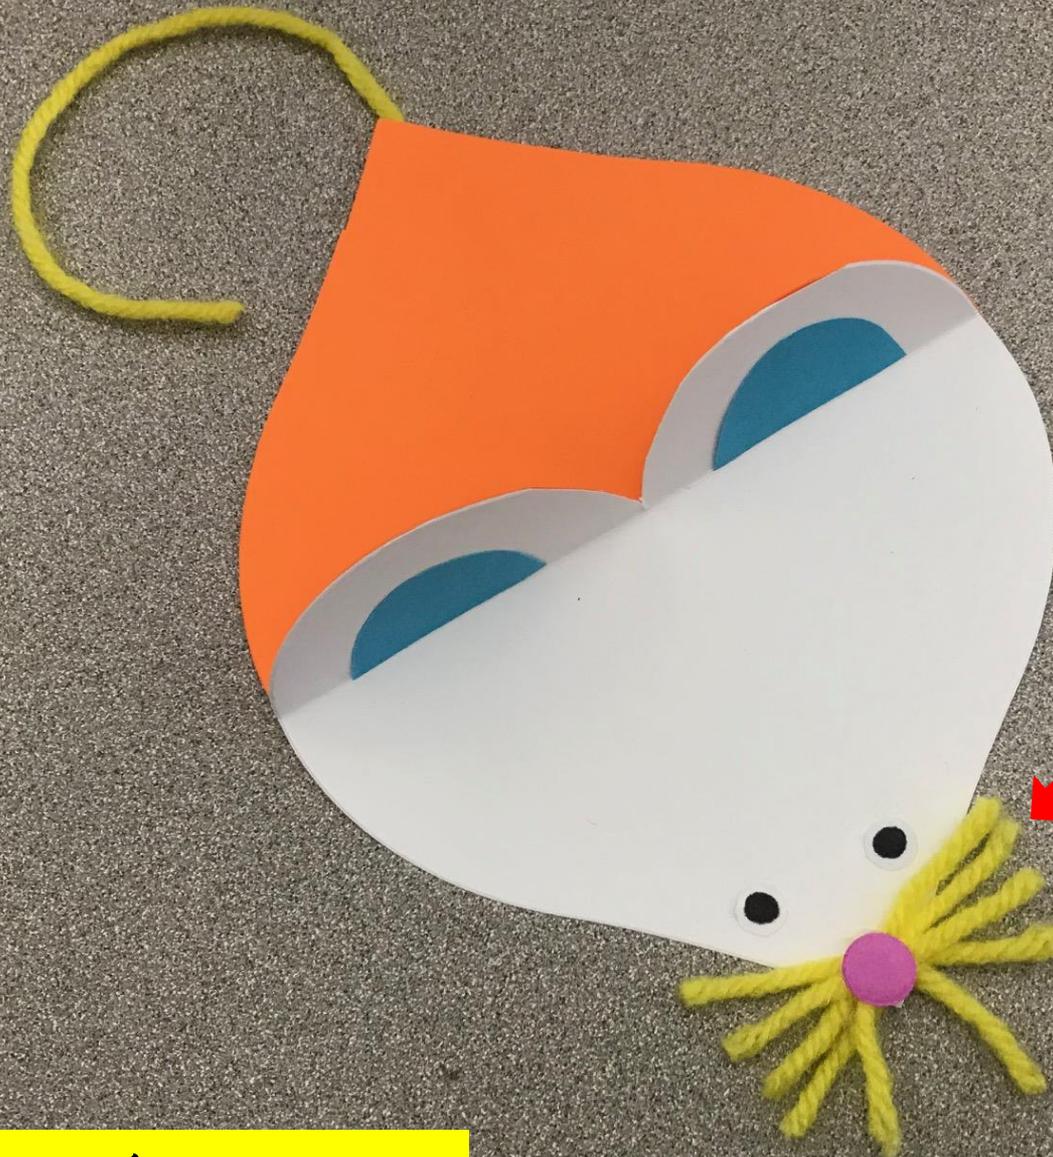

Fold the hearts to make the ears. I fold right below the dip. Glue the hearts together.

Cut the inner ears out. I use different colored paper, then draw a circle, cut it out and cut the circle in half. If colored paper is not available you can use markers or crayons to color your inner ears for contrast. If you have a hole punch, use the circles for the eyes and nose. I made an eye by coloring the center with a black pen.

Flip your mouse over and tape on the tail.

Flip back over and glue on Mouses' nose. Use a lot of glue for it to stick to the yarn... Yea! Good Work!

Mouse is Done!
