

# Awesome Yarn Monster

## Supplies:

Yarn

1 Pipe Cleaner

2 Google Eyes

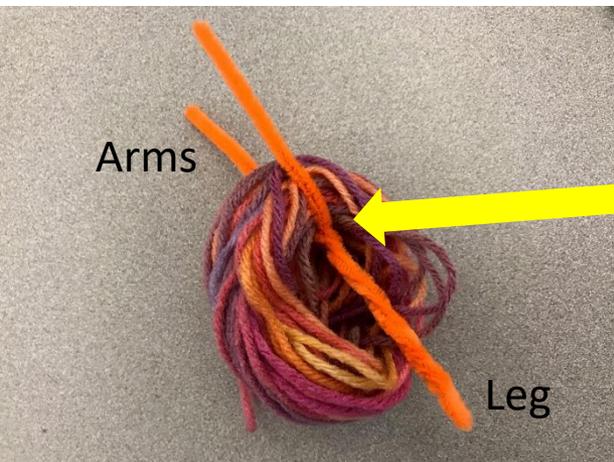

Scissors, Glue Stick

Wrap the yarn around your hand at least 50 times. The more you wrap the fluffier the monster. (My monster was 50 times.)

Gently take the wrapped yarn off your hand and put it to one side. (It looks like an O) Take your pipe cleaner and bend it in half. Where it is bent, start to twist until you reach the middle of the pipe cleaner. ( It looks like a Y)

The next step is to take the pipe cleaner and thread one of the arms through the center of the O shaped wrapped yarn.

Now take the pipe cleaner arms and twist two times to secure the yarn. Make sure you twist as close to the leg as possible so the yarn is held tight.

Now you can cut the yarn! If the ends are uneven go ahead and trim them. 😊

The next step is to create a spiral with each of the pipe cleaner arms. This will be the base for the google eye.

Then bend the leg of the pipe cleaner at a 45 degree angle. This will help the monster stand up.

The last step is to glue the google eyes. What I do is scrape the google eye across the glue stick to get an ample amount on the back of the eye. I then stick it on the pipe cleaner spiral. Yea!

*Say hello to your new Monster Friend!*
